

A fine, soft leaf.

Sapphire® Soft Leaf Buffalo delivers solid performance with the added benefit of fine texture. Its folding leaf creates a lawn that is unbeatably soft.

Sapphire® is hard-wearing and has a quick recovery rate, making it an ideal choice for active families and households with large dogs.

Because of its deep root system, Sapphire® has excellent cold tolerance – it has a brilliant winter colour in Sydney, Melbourne, Perth, Brisbane and Adelaide. Even in colder climates like Canberra, Sapphire® will hold its winter colour longer than most varieties.

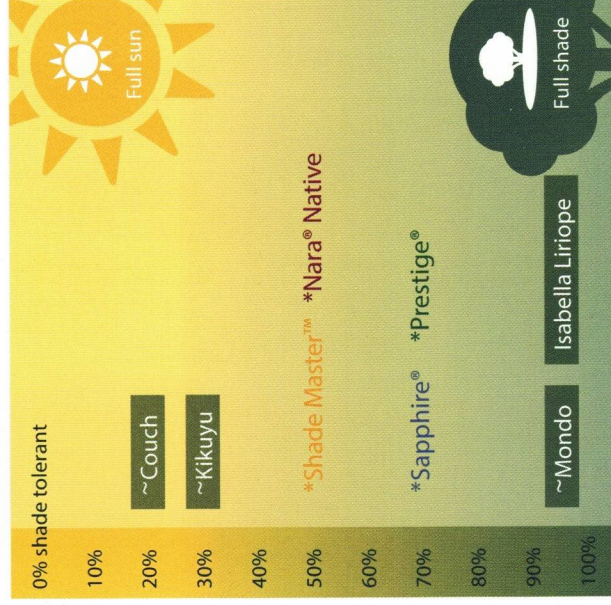

With its deep root system, Sapphire® is an efficient water user and drought tolerant.

Maintenance

- ✓ Cut to 2cm-5cm in sun or light shade, or 5cm-7cm in heavier shade
- ✓ Mow every 5-10 days in warmer months, and every 3-6 weeks in colder months
- ✓ Fertiliser is recommended twice a year: once in early April and once in September

Sapphire® Soft Leaf Buffalo is drought tolerant once established – but, like all plants, needs water. Requirements will vary depending on environmental factors. Be aware of a drying climate and water your lawn accordingly.

Shade tolerance comparison...

*Shade tolerance in low wear conditions.
~Approximations based on typical performance of common varieties.

So soft. So fine. So beautiful.

Sapphire®

SOFT LEAF BUFFALO

Wear Tolerance	Medium-high
Drought Tolerance	6.5/10
