Ozbreed Blend Slow Release Fertiliser

**Recommended for use
with Sapphire Turf**

Value for Money

Although it costs more, it covers more area, is better quality and lasts longer than competitors quick release fertilisers.

E.g. Ozbreed's Slow Release Fertiliser 4kg bucket covers 200 sqm while a competitors 4kg fertiliser bucket only covers 150sqm and only lasts a week if you are lucky.

No Burn

Doesn't need to be watered in, so it will not burn your lawn.

Spring Blend and Summer/Autumn Blend

Two different blends to ensure your lawn is getting the right nutrients for the right time of year.

Available through select turf growers & online at www.ozbreed.com.au
